## ABC partners with The Royal Institution of Australia

The ABC and The Royal Institution of Australia have announced a partnership to inspire and educate Australian audiences of all ages with innovative and distinct science stories.

The partnership will ensure audiences will have access to original Australian science content from Australia's Science Channel, made available across a range of ABC platforms including iview, ABC Science and ABC Education.

ABC audiences will be both entertained and inspired by the content suite which includes video, audio and science news from leading minds in Australian universities and institutions. A selection of content can already be seen on *iview* which features some of the best science features, shorts, documentaries, animated and experimental films from filmmakers around the world who have participated in *SCINEMA* - the largest science film festival in the southern hemisphere.

David Anderson, Director Television said: "The ABC is proud to be partnering with such a distinguished and reputable organization as The Royal Institution of Australia to provide ABC audiences with distinctive content that bolsters Australian conversations about science."

Bradley Abraham, Chief Executive Officer and Director of The Royal Institution of Australia said: "We are excited to be working in partnership with the iconic ABC who share our vision and commitment to highlight the relevance of science in everyday life and to build Australia's future by creating conversations that inspire the next generation."

---

### About The Royal Institution of Australia

The Royal Institution of Australia is an independent charity and unique national science hub promoting public awareness and understanding of science. The Royal Institution of Australia is home to Australia's Science Channel, Australia's first dedicated publishing platform for science stories, free to all Australians.
